Appendix: Date of introduction of travel restrictions – entry bans and mandatory quarantines – across independent states worldwide

NOTES: Entry bans do not include mere suspension of flights to/from by a single national airline, as long as entry by other airlines is not banned. Only if the national airline is the only direct connection and there is no land border, this is counted as an entry ban. Also not counted are entry bans that apply only to parts of the banned country (e.g., Wuhan/Hubei; Northern Italy). Entry bans do not have to cover nationals and permanent residents returning. Finally, suspension of issue of "visa on arrival" alone is also not counted as an entry ban, because it continues to permit entry of travelers who already have a visa or apply for it. Entry bans that cover all countries with any corona cases count as full entry bans. Similar for mandatory quarantines that apply to all countries with any corona cases.

Some countries require the 14-day quarantine to be absolved abroad (in countries with no or very few corona cases) combined with a medical certificate of being corona free before admitting travelers. Non-mandatory quarantine recommendations are not coded.

All measures were only coded if they were in force for at least 14 days.

	Entry ban for all foreign non-residents	14-day quarantine for all who enter from abroad	Entry ban for (foreign) travellers from China (if not yet included in broader measures)	14-day quarantine for people entering from China	Entry ban (or flight ban if not bordering Italy) for foreign non-resident travellers from Italy (if not yet included in broader measures)	14-day quarantine for (foreign) travellers entering from Italy (if not yet included)
